

POLYPROPYLENE CASEWORK

WHY SELECT POLYPROPYLENE CASEWORK?

Polypropylene is known for its durability to withstand harsh chemical exposure, corrosion, and for solvent and impact-resistance. The investment in polypropylene can provide a greater value long term when compared to the replacement cost of metal or wood equivalents which could rust and corrode. Polypropylene is ideal for laboratories, requiring no exposed metals or low electrical conductivity.

LabAire Systems works with architects, laboratory planners, principal investigators, and purchasing departments on any size project. Our line of modular casework is designed for maximum chemical resistance with hinges, fasteners and adjusting hardware that are all fabricated from polypropylene.

Select from a wide range of cost-effective fixed or mobile components in standard sizes and add custom-sized designed modules where required.

STANDARD FEATURES OF POLYPROPYLENE CASEWORK

MATERIAL: 1/2" thick, 100% stress-relieved virgin, white polypropylene.

CONSTRUCTION (A): Fully welded cabinet and drawer construction, sealed to contain spills.

HINGES & CLOSURE: Single-piece, polypropylene 5 knuckle hinges and fully-recessed magnetic closures.

DRAWERS (B): Single piece, polypropylene drawers with low-friction UHMW drawer guides.

UPPER CABINET: 12" deep by 24" or 30" tall, with polycarbonate windows or solid doors.

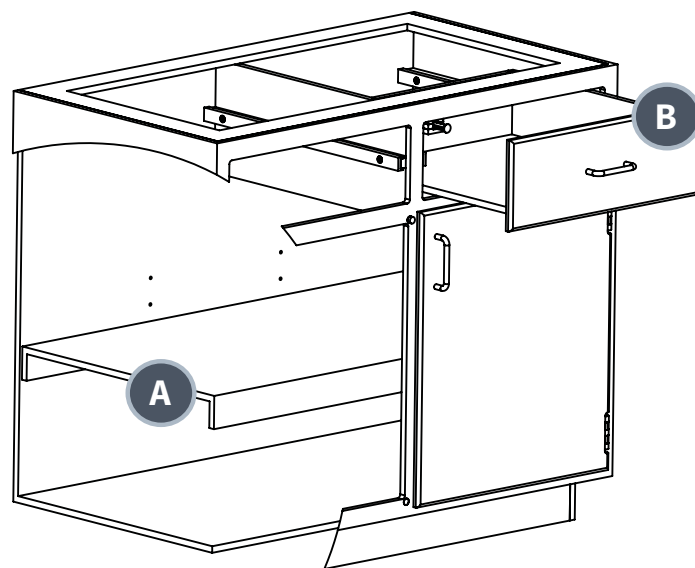

PULLS: Polypropylene pull handle.

SINK CABINETS: Removable plumbing access panel.

BASE CABINETS: 22" deep by 29"(sitting) or 35"(standing) not including countertop.

SHELVES: 1" spill containment provided on all shelves.

ADA-COMPLIANT: Most cabinets available 33" height.

Polypropylene drawers with UHMW drawer guides

Magnetic Latch

Single piece, polypropylene hinges and fasteners

OPTIONAL FEATURES

MATERIAL: Black or natural polypropylene, flame-retardant polypropylene (UL94V or FM4910), PVC, PVDF, and other thermoplastics

WINDOWS: PVC & Clear Polycarbonate.

SLIDING DOORS: Standard handle only.

HARDWARE: Non-ferrous, recessed flush handles, locks, adjustable legs, locking or leveling casters.

DRAWERS: File drawer, specialty dividers, self-closing.

SHELVES: Open shelves and/or storage.

COUNTERTOPS: Epoxy, polypropylene, HDPE

SINKS: Polypropylene or epoxy.

UTILITIES: GFCI outlets, faucets, turrets (deck or wall-mounted), and N2/DI Spray Guns.

BASE CABINETS WITH DRAWERS

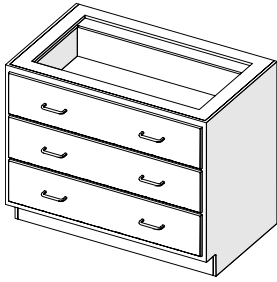

Pictured With Optional Recessed Handles

ABOUT

LAS drawer only base cabinets consist of standard configurations from three drawer up to nine drawer combination cabinets. All LAS base cabinets are available in sitting, standing and ADA compliant heights. LAS uses low friction drawer guides/glides material for effortless operation. LAS also offers an optional soft-close mechanism, allowing the drawers to close silently and smoothly. Custom configurations and sizes are available and welcomed.

BASE CABINETS WITH DRAWERS & DOORS

Pictured With Optional Recessed Handles

ABOUT

LAS drawer/door combination base cabinets come with multiple standard configurations of doors (single or double) with up to four drawers. All cabinet doors are fastened with single-piece, recessed knuckle hinges and feature single piece polypropylene pulls. The internal shelves are removeable, adjustable by height and reversible, engineered with a one inch spill containment or a traditional flat surface. Standard base cabinets are available in sitting, standing and ADA compliant heights. LAS uses low friction drawer guides/glides material for effortless operation. LAS also offers an optional soft-close mechanism, allowing the drawers to close silently and smoothly. Custom configurations and sizes are available and welcomed.

BASE, SINK, VENTED, AND TALL CABINETS

Pictured With Optional Recessed Handles

ABOUT

LAS manufactures multiple variations of standard base cabinets to accommodate countertops, sinks, plumbing, internal ventilation, and fume hoods. All cabinet doors are fastened with single-piece, recessed knuckle hinges and single piece polypropylene pulls. The internal, adjustable shelves are reversible, engineered for a one inch spill containment or a traditional flat surface. Standard base cabinets are available in sitting, standing and ADA compliant heights. The LAS tall cabinets range in height from five to seven feet high. Custom configurations and sizes are available and welcomed.

FUME HOOD BASE CABINETS

Pictured With Optional Recessed Handles

ABOUT

LAS manufactures multiple base cabinets and base stands to support our Fume Hoods and Enclosures, and are designed to accommodate countertops, sinks, plumbing and internal ventilation. Standard base cabinets and stands are available in sitting, standing and ADA compliant heights; made of ½" stress-relieved polypropylene and can be vented for chemical storage. Other non-polypropylene options include flammable storage cabinets and painted metal base stands. All LAS base cabinet structures are manufactured to optimize space and safely support each Fume Hood.

WALL CABINETS & SHELVING

Pictured With Optional Recessed Handles

ABOUT

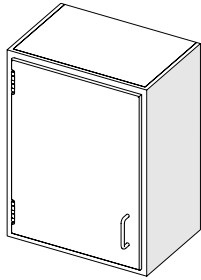

LAS wall cabinets are single piece construction with single-piece, recessed knuckle hinges and polypropylene pulls. The internal, adjustable shelves are reversible, engineered with a one inch spill containment or a traditional flat surface. All cabinets come with either solid door or polycarbonate glazing, and adjustable shelves with one inch spill containment. Standard wall cabinets are available 12 inches deep and either 24 inches or 30 inches tall. Custom configurations and sizes are available and welcomed.
